

Waste Management in the Public Sector 2021

ONLINE EVENT

7TH JULY

IGPP Institute of Government
& Public Policy

University of
East London

About the event

In line with the Government's 25 Year Environment Plan, the Resources and Waste Strategy published in August 2020 sets out goals for how England will preserve material resources by minimising waste, promoting resource efficiency and moving towards a circular economy. The targets include ensuring that 65% of municipal waste is recycled by 2035 and eliminating all avoidable waste by 2050.

This timely conference will explore how local authorities can rise to the challenge of meeting the environmental targets of the Resource and Waste Strategy as well as redesigning and digitising their waste services to become more efficient and save money.

Hear practical case study examples from councils who have been successful at transforming their waste management operations by digitisation, service redesign, recycling food and plastics and improving commercial waste management services. Government and industry bodies will deliver the most up-to-date guidance and information, plus you'll hear from leading industry experts and academics revolutionising waste management for a more sustainable future.

Why attend?

- Hear practical case studies of recent innovate waste management projects in local authorities across the UK
- Get the latest updates on the Waste Strategy in England and progress of the 25 Year Environment Plan
- Get the latest information on how to accelerate the move to a more sustainable economy through re-use and recycling of waste materials

Learning outcomes

- Find out about the future of Energy for Waste technologies and how they can assist with becoming zero-emission and resource-efficient by 2050
- Learn how councils have achieved significant financial gains and service improvements by restructuring and digitising their waste management services
- Hear case studies from councils who have achieved success in recycling plastic and food waste

Audience

Our Waste Management in the Public Sector event brings together Heads Directors and Managers of Waste Management, Environmental Services, Refuse Services, and Recycling from local government, councils, and the private sector to hear the latest policy updates and address the challenges facing the sector in these unprecedented times.
